

# Leon van Klaveren

## Leon van Klaveren

industrial design engineer  
18-05-1998

### profile

I enjoy the feeling of progressiveness. I strive for a large output in a given time frame. While producing simple and valuable designs for the end user, I focus on simplicity and user friendliness. I like to improve sustainably, where the change will have a long lasting impact on your company. I am openminded, optimistic and multidisciplinary which makes it easy to integrate in larger teams. I have a wide range of skills, something that works perfectly in the communication field with other professions.

### experience

#### 2018 - 2019 | Internship @the-incredible-machine

During my internship at The Incredible Machine in Rotterdam I worked for several clients, under whom; Lego, FairBike, Safran Cabin and ROC Mondriaan. This was my first experience as an industrial designer in the current market.

#### 2017 - present | Co-founder @DelftByCycle

Started in December 2017 with three entrepreneurs, it was time to put my skills to the test. DelftByCycle is a company that gives tourists the opportunity to discover Delft with private guides. While providing an optimal experience for our customer, I learn how to deal with difficulties in the real market. My responsibilities concern marketing, design, advertisement, website and interaction with the client.

#### 2016 - present | Founder @Leon design

In 2016 I started my webdesign based company called Leon Design, a long lasting interest in the world wide web gave my self-taught brain the opportunity to investigate in this profession. I work with more than twenty clients and provide them my full insight in how to grow their business digitally. With front and backend experience I create a streamlined workflow with optimal output.

#### 2015 - present | Manager @KistjevoSmaak!

When first asked to run the business for two weeks during the holidays, I got full understanding of the tasks involved around running a business yourself. Next to KistjevoSmaak! I also made a debut as employee at Ambacht and the Delftse Molen.
